

## Lesson Plan

Name of the Faculty : Sh. Munish Kumar Jain  
 Discipline : Mechanical Engineering  
 Semester : 5<sup>th</sup>  
 Subject : Machine Design  
 Lesson Plan duration : 17 weeks (01.10.2021 to 28.01.2022)  
 Work load per week : Lecture – 04, Practical – 00

Week	Theory	
	Lecture Day	Topic (Including assessment/test)
1 <sup>st</sup>	1 <sup>st</sup>	Subject introduction and overview
	2 <sup>nd</sup>	<b>Unit 1: Introduction</b> Design – Definition, Type of design, necessity of design
	3 <sup>rd</sup>	Comparison of designed and un designed work, Design procedure
	4 <sup>th</sup>	Characteristics of a good designer, Design terminology: stress, strain, factor of safety, factors affecting factor of safety
2 <sup>nd</sup>	5 <sup>th</sup>	stress concentration , methods to reduce stress concentration
	6 <sup>th</sup>	fatigue, endurance limit
	7 <sup>th</sup>	General design consideration
	8 <sup>th</sup>	Codes and Standards (BIS standards)
3 <sup>rd</sup>	9 <sup>th</sup>	Engineering materials and their mechanical properties
	10 <sup>th</sup>	Properties of engineering materials: elasticity, plasticity, malleability, ductility, toughness
	11 <sup>th</sup>	Hardness and resilience. Fatigue, creep, tenacity and strength etc.
	12 <sup>th</sup>	Selection of materials, criteria of material selection
4 <sup>th</sup>	13 <sup>th</sup>	<b>Unit 2: Design Failure</b> Various design failures-maximum stress theory
	14 <sup>th</sup>	Maximum strain theory, Classification of loads
	15 <sup>th</sup>	Design under tensile, compressive and torsional loads
	16 <sup>th</sup>	Numerical Problems
5 <sup>th</sup>	17 <sup>th</sup>	<b>Unit 3: Design of Shaft</b> Type of shaft, shaft materials

	18 <sup>th</sup>	Type of loading on shaft, standard sizes of shaft available
	19 <sup>th</sup>	Shaft subjected to torsion only, determination of shaft diameter (hollow and solid shaft) on the basis of: Strength criterion
	20 <sup>th</sup>	Shaft subjected to torsion only, determination of shaft diameter (hollow and solid shaft) on the basis of: Rigidity criterion
6 <sup>th</sup>	21 <sup>st</sup>	Determination of shaft diameter (hollow and solid shaft) subjected to Bending
	22 <sup>nd</sup>	Determination of shaft diameter (hollow and solid shaft) subjected to combined torsion and bending
	23 <sup>rd</sup>	Numerical Problems
	24 <sup>th</sup>	<b>Unit 4: Design of Key</b> Types of key, materials of key, functions of key
7 <sup>th</sup>	25 <sup>th</sup>	<b>1<sup>st</sup> sessional test (Tentative)</b>
	26 <sup>th</sup>	<b>Assessment</b>
	27 <sup>th</sup>	Failure of key (by Shearing)
	28 <sup>th</sup>	Failure of key (by Crushing)
8 <sup>th</sup>	29 <sup>th</sup>	Design of key (Determination of key dimension)
	30 <sup>th</sup>	Effect of keyway on shaft strength
	31 <sup>st</sup>	Various Figures and problems
	32 <sup>nd</sup>	<b>Unit 5: Design of Joints</b> Types of joints - Temporary and permanent joints, utility of various joints
9 <sup>th</sup>	33 <sup>rd</sup>	Temporary Joint: Knuckle Joints – Different parts of the joint, material used for the joint
	34 <sup>th</sup>	Type of knuckle Joint,
	35 <sup>th</sup>	design of the knuckle joint
	36 <sup>th</sup>	Figures and problems
10 <sup>th</sup>	37 <sup>th</sup>	Cotter Joint – Different parts of the spigot and socket joints
	38 <sup>th</sup>	Design of spigot and socket joint
	39 <sup>th</sup>	Figures and problems
	40 <sup>th</sup>	Revision
11 <sup>th</sup>	41 <sup>st</sup>	<b>2<sup>nd</sup> sessional test (Tentative)</b>
	42 <sup>nd</sup>	<b>Assessment</b>
	43 <sup>rd</sup>	Permanent Joint: Welded Joint - Welding symbols. Type of welded joint
	44 <sup>th</sup>	Strength of parallel and transverse fillet welds

12 <sup>th</sup>	45 <sup>th</sup>	Strength of combined parallel and transverse weld
	46 <sup>th</sup>	Riveted Joints. : Rivet materials, Rivet heads
	47 <sup>th</sup>	leak proofing of riveted joint – caulking and fullering
	48 <sup>th</sup>	Different modes of rivet joint failure
13 <sup>th</sup>	49 <sup>th</sup>	Design of riveted joint – Lap and butt, single and multi riveted joint
	50 <sup>th</sup>	<b>Unit 6: Design of Flange Coupling</b> Necessity of a coupling, advantages of a coupling, types of couplings
	51 <sup>st</sup>	design of muff coupling, design of flange coupling. (both protected type and unprotected type)
	52 <sup>nd</sup>	<b>Design of Screwed Joints</b> Introduction, Advantages and Disadvantages of screw joints, location of screw joints
14 <sup>th</sup>	53 <sup>rd</sup>	Important terms used in screw threads, designation of screw threads
	54 <sup>th</sup>	Initial stresses due to screw up forces, stresses due to combined forces
	55 <sup>th</sup>	Design of power screws (Press)
	56 <sup>th</sup>	Design of power screws (screw jack)
15 <sup>th</sup>	57 <sup>th</sup>	Design of power screws (screw clamp)
	58 <sup>th</sup>	<b>3<sup>rd</sup> sessional test (Tentative)</b>
	59 <sup>th</sup>	<b>Assessment</b>
	60 <sup>th</sup>	Revision
16 <sup>th</sup>	61 <sup>st</sup>	Revision
	62 <sup>nd</sup>	Revision
	63 <sup>rd</sup>	Revision
	64 <sup>th</sup>	Revision
17 <sup>th</sup>	65 <sup>th</sup>	Revision
	66 <sup>th</sup>	Revision
	67 <sup>th</sup>	Revision
	68 <sup>th</sup>	Revision
